INTRODUCING !

RED DELIGHT APPLE

U.S. Plant Patent No. 1974

THE LARGEST HIGH QUALITY APPLE WE'VE EVER SEEN.

Red Delight is a spicy sweet, juicy apple reminding you of both Stayman Winesap and Delicious.

A beautifully colored apple of tremendous size ripening in early fall. Many of these apples have weighed over 1 pound each. (We made a pie from one apple.)

Red Delight is an extremely long keeping apple.

Red Delight is a late bloomer. It sets fruit in areas where apples have never before been successful or regular bearing due to frost damage. It is so fruitful that trees bear many clusters of 2, 3, and sometimes 4 fruits.

Red Delight is a strong vigorous grower with limber branches to hold large crops.

Moraine® Ash

"Beauty in Symmetry"

A beautifully formed, medium sized shade tree that holds its luxurious olive-green foliage into late Autumn.

BEAUTY TO ENJOY FROM YOUTH TO MATURITY: The Moraine ash forms itself symmetrically in early growth, keeps its distinctive shape as it reaches full height (35 to 40 feet).

A CLEAN, TIDY TREE that doesn't make you work: When the small olive-colored foliage falls, it sifts through the lawn easily to eliminate leaf raking. The Moraine Ash also features a smooth attractive bark on trunk and limbs that adds to its cleanliness and desirability.

HARDY, VIGOROUS: Tests prove the Moraine Ash prospers in climatic conditions throughout most of the United States, including Maine, Montana, and North Dakota. You enjoy its beauty later in Autumn than most ash trees.

IDEAL FOR STREET, LAWN PLANTING: This tree has none of the undesirable traits usually associated with the common ash. The Moraine Ash shapes itself, holds foliage into late Autumn, and its lacy shade permits luxurious lawn development. It's an ideal tree to add new interest and beauty to any landscape planting.
